ELITE QUICK 101

(Integral water reducing Fast Curing & Hardening Concrete Compound)

PRODUCT INFORMATION: It is liquid integral water proofing and water reducing admixture. It gives high end strength and excellent plasticizing effect along with better water reducing quality, plasticizer for Slabs, columns, walls, foundations and pavements, electric cement poles, pcc pipes etc.

USES AND ADVANTAGES:

- Used for best quality concrete and ready-mix concrete.
- Compatible with all types of cement.
- Gives best surface finish.
- Keeps safe re-enforcement. Corrosion resistance for steel.
- Can be used in high temp. area.
- Retains long period slump flow.
- Best water reduction and tightness.
- Very good waterproofing and workability.
- Best ultimate compressive strength.

MEETS: IS 9103 – 1999 and ASTM C494

Sr.No.	Parameters	Results
01.	Appearance	Brown Liquid
02.	Form	Liquid
03.	Self life	12 Months
04.	Density	1.170 Kg./Ltr@25°C
05.	PH	6
06.	Solubility	Soluble in Water
07.	Boiling Point	100°C
08.	Odour	Product Specific

Dosage: 1.5 % to 2% weight of cement.

Packaging: 20 Kgs. /50 Kgs. /250 Kg.

PRECAUTIONS:

- Stir well before use
- Do not add excessive water to avoid bleeding.
- Fresh concrete must be cured as per normal standards.
- Clean all equipments immediately after finishing job.
- Follow recent safety norms e.g. Toxicological, workmen safety and ecological.

Legal Notes: The user should test the product suitability before major work to select dose size etc. In practice the differences in material, sand, cement, substrates and actual site atmospheric condition like, temperature, rain and cold etc. are variable and uncontrollable and are such that no warranty in respect of fitness and merchantability for particular purpose. All technical information above is on the basis of our Lab. Trials. Actual data may vary due to site conditions beyond our control.
